

# American Academy of Neurology (AAN)

## Modernizing medical education and streamlining content delivery with Path LMS

### Summary

The American Academy of Neurology (AAN) faced a challenge with its over-customized learning management system (LMS). Over the years, AAN's legacy LMS had become hard to maintain, with only a few staff understanding the platform's complex customizations. Software updates were slow, posing a significant barrier to modernization.

AAN decided to begin its search for a new LMS. AAN's choice? Path LMS.

### Solutions

- ✓ Multi-format learning
- ✓ CME credit management
- ✓ Bulk content uploading and management
- ✓ Custom course components and templates
- ✓ Custom report builder
- ✓ Assessment question banks

"It's great to know that Path LMS considers all its clientele. The team is willing to work with us to make sure they have the best product while also considering everyone's story and everyone's need for the platform."

**Jeff Wessel**, AAN Digital Content Strategist

## ↔ Challenge & Solution

AAN serves over 40,000 global members including neurologists, neuroscientists, residents, advanced practice providers, and health care professionals. With AAN's legacy LMS, technology updates and upgrades took longer than expected to complete and sometimes were never finished. These delays caused inefficiencies in creating, updating, and managing learning content creating a negative impact on both the staff and end user experience.

Because its legacy LMS was so highly customized, only a select few AAN staff knew how to use the platform, putting more work on their shoulders. With these challenges in mind, AAN selected Path LMS for its integration capabilities and powerful bulk content management tools.

## ★ Results

After AAN chose Path LMS, staff transformed content operations, effectively managing massive educational libraries, including 1,400+ annual conference presentations organized into 400+ courses, processed simultaneously through Path LMS's bulk import capabilities. The AAN Annual Meeting on-demand product alone offers 350+ CME-eligible programs while advanced reporting capabilities have dramatically streamlined operational efficiency. AAN staff also save significant time leveraging intelligent course duplication and template systems, rather than building content libraries from scratch.

Moving forward with Path LMS and the platform's responsive customer support, the AAN has transformed into an innovative leader, positioning AAN at the forefront of medical education delivery.

"The accessibility of support at Path LMS has been a positive. You're not just out on your own island where you're figuring things out and your vendor just goes into a void where you rarely hear back."

**Elizabeth Bradshaw**, AAN, Associate Director, Digital Content

### About the American Academy of Neurology (AAN)

The American Academy of Neurology (AAN) is the leading voice in brain health. As the world's largest association of neurologists and neuroscience professionals, the AAN offers access to continuing education, essential practice tools, research grants, networking and advocacy opportunities, and more.

**40,000+**

Members

**350+**
